

February 29, 2008

The Honorable Jim Walsh
Ranking Member
Appropriations Subcommittee on Labor, Health and Human Services,
Education & Related Agencies
1016 Longworth House Office Building
Washington, DC 20515

Dear Representative Walsh:

We would like to urge the Subcommittee to provide \$25 million for the Emergency Medical Services for Children (EMSC) program in the Health Resources and Services Administration in Fiscal Year 2009.

The EMSC program drives critical improvements to the emergency care delivered to our children all across the nation. Every state has received EMSC funds, which they have used to ensure that hospitals and ambulances are properly equipped to treat pediatric emergencies, to provide pediatric training to paramedics and first responders, and to improve the systems that allow for efficient, effective pediatric emergency medical care. In the 24 years since the program was established, nationwide child injury mortality rates have dropped by over 40 percent.

For the past eight appropriations cycles, the EMSC program has been essentially level-funded at \$19 million. Given that inflation has increased by two to four percent each of those years, the program now has significantly less financial impact than it did at the beginning of the millennium. We urge you to increase the EMSC program's funding to ensure that it can maintain and improve its activities, take advantage of important opportunities, and address emerging threats to child health such as terrorism.

Thank you for your consideration. We look forward to working with you to improve emergency medical services for children across our nation.

Sincerely,
