Washington, DC 20515  Washington, DC 20515

Dear Chairmen Blunt and Cole and Ranking Members Murray and DeLauro:

The undersigned members of the CDC Coalition urge you to provide $7.8 billion for the Centers for Disease Control and Prevention’s programs in the FY 2016 Labor, Health and Human Services, Education and Related Agencies Appropriations bill. We are pleased President Obama’s FY 2016 budget request would increase CDC’s program level by $141 million over FY 2015. While this additional funding provides some resources for new and important initiatives and increased funding for some programs, other important programs would be cut or are completely eliminated under the president’s request. We believe that Congress should prioritize funding for all of the activities and programs supported by CDC that are essential to protect the health of the American people.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation’s public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to assure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators, and citizens served by CDC programs.

CDC is faced with unprecedented challenges and responsibilities ranging from emergency preparedness, chronic disease prevention, to combating the tobacco and obesity epidemics. CDC funds programs for injury control and violence prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease, stroke, cancer, lung disease and other chronic diseases; nutrition and physical activity; immunization; environmental health; oral health; preventing infant mortality and birth defects; preventing antimicrobial resistance; preventing prescription drug overdose and public health research and health statistics. It is notable that more than 70 percent of CDC’s budget supports public health and prevention activities by state and local health organizations and agencies, national public health partners and academic institutions.
CDC serves as the command center for the nation’s public health defense system against emerging and reemerging infectious diseases. From aiding in the prevention and control of Ebola in West Africa and detecting and responding to cases in the U.S., to monitoring and investigating the ongoing multi-state measles outbreak to pandemic flu preparedness, CDC is the nation’s – and the world’s – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and the international community rely on CDC for accurate information and direction in a crisis or outbreak.

In addition to ensuring a strong public health infrastructure and protecting Americans from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency’s programs have been woefully underfunded to confront the myriad public health issues facing the nation. **We urge you to support a funding level of $7.8 billion for CDC programs in FY 2016.**

Please contact Don Hoppert at donald.hoppert@apha.org or 202-777-2514 with any questions regarding our request.

Sincerely,
