Dia,

After reading the suggested changes I see possible problems with some of the wording and I’m suggesting some changes. The problem as I see it is describing the ambulance as fully complies and having deviations. Certifying the vehicle with described deviations should work for all parties.

4.17 Statement of Exceptions. The entity responsible for final assembly of the ambulance shall deliver with the ambulance either a certification that the ambulance fully complies with all applicable requirements of this standard or, alternatively, including a When deviations to this standard are required by purchaser a Statement of Exceptions based on any deviations to this standard that are required to meet the specification of the purchaser shall be listed and attached to owner’s manual, specifically describing each aspect of the completed ambulance that is not fully compliant with the requirements of this standard at the time of delivery.

4.17.1 The Statement of Exceptions shall contain, for each deviation to full compliance of the ambulance or missing required item at the time of delivery, the following information:

(1) A separate listing of the section(s) of the applicable standard for which compliance is lacking a deviation to full compliance has occurred

(2) A description of the particular aspect of the ambulance where a deviation to full compliance has occurred
