Emergency Division

The Israeli Trauma Society

The Teaching Center for Trauma, Emergency and M.C.I.
Emergency Department Nurses

Operating Room, Imaging Department, I.C.U., Surgical Departments

Nurses who reinforce the Emergency Department in M.C.S.

Main Subjects

- Approaching the injured patient
- Pre-Hospital Care
- Treating the patient according to the different injured body systems, such as - Airway, Chest, Head, Abdomen, Shock
- Special consideration - Pediatrics, Burns, Acute Stress Reaction, Care Management, Team Work

Main Subjects

M.C.S. and Preparedness for M.C.S.

Hospital Preparedness, Functioning of the Emergency Room in M.C.S.
Nurse's role in organizing and treating patients in M.C.S.

Reference - ABC OF MAJOR TRAUMA
Approaching the injured patient
E.R. Procedures - Intubation, Chest Tube Insertion, High Flow I.V. Lines
Tabletop Drills, Simulations
Mental approach to Acute Stress Reaction Workshop

Psychomotor Skills Stations

Simulation based training program

Theoretical phase -
Lectures
• Mass Casualty Life Support
• Team Work
• Computer Based Simulation

Practical phase -
Hands-On Simulation Training
Mass Casualty Situations

Improve Quality of Care
Improve Organization of Hospitals and Pre-Hospital
importance in preparing medical teams

function well in peace time will function well in M.C.S.

M.C.S. also occur in places where treatment of casualties is uncommon.

Teaching methods and guidelines for preparing medical teams for M.C.S.
