NASEMSO engages in periodic data collection from state EMS offices to determine how each state’s programs compare in terms of structure, services, and regulations. The documented results are very useful to anyone who is interested in national, state, and local EMS policy development.

RECENT MONOGRAPHS

- **Incorporation of EMS Patient Care Data in State Data Linkage Programs**
  This study was produced by NASEMSO with support from the U.S. Department of Transportation, National Highway Transportation Safety Administration. This monograph reports the results of a survey of state EMS offices to assess the extent to which emergency medical services patient care records are linked with other record systems in the states, the history and near-future plans for data linkage efforts, the perceived issues that may impede data linkage efforts, steps that would likely reduce those impediments, and how those data are used by the states. (2012)

- **The Status of State Trauma System Planning and Development and Utilization of the HRSA Model Trauma System Planning and Evaluation Documents**
  In this study, NASEMSO surveyed the status of state trauma systems by specifically examining the access and use of the Health Resources and Services Administration’s “Model Trauma System Planning and Evaluation Guide” and its companion self-assessment tools. The monograph represents a snapshot in time of the status of U.S. state trauma systems. This monograph can be used to identify strengths of our state trauma systems and can also be utilized to identify opportunities for improvement. (2010)

- **The Status of State Emergency Medical Services Office Funding and Utilization of Section 402 and 408 Highway Safety Funding**
  This monograph reports on NASEMSO’s third comprehensive examination of state EMS funding. To the extent that funding equals resources, the level and trends associated with state EMS funding represent an important area of interest relating to a component of the healthcare system charged with a critical safety-net function. In this study, NASEMSO examined the levels and sources of all funding to support state EMS offices for Fiscal Year 2009 and compared those data with comparable information from previous studies. NASEMSO also specifically examined the access and use of Section 402 and Section 408 Highway Safety funding currently experienced by state EMS offices. (2009)
