

REGISTRATION FOR FSAM MANUFACTURERS PRODUCING CAAS GVS CERTIFIED VEHICLES

FSAM companies producing CAAS GVS certified vehicles are required to register with CAAS GVS in order to obtain the GVS certification stickers and verification documents required to certify these vehicles.

CAAS GVS provides these stickers and associated document templates to FSAM companies who attest that they will comply with all verification and certification requirements for vehicles they produce. CAAS GVS provides no recommendation or validation of any ambulance manufacturer or their certifications, and cannot be held responsible for any discrepancy, misunderstanding or misrepresentation by a FSAM.

The FSAM is required to certify each vehicle as compliant with CAAS GVS v.1.0. The FSAM is obligated to certify to the purchaser that the ambulance bearing the “CAAS GVS v.1.0” label, its components and equipment meet or exceed all the requirements and tests set forth in the standard. See CAAS GVS Section D for additional information on verification of these requirements.

VEHICLE CERTIFICATION PACKAGE – GVS Certification requires three documents to verify compliance for each vehicle:

- 1) A serialized multicolored CAAS GVS v.1.0 Certification Sticker installed on the vehicle. This is a two part sticker that will come to you already imprinted with your name as the registered FSAM, and serialized to your company. A separate template will allow you to enter specific vehicle data in a window that will be visible to the customer and inspector when the sticker is applied to a GVS certified vehicle.
- 2) A multicolored Vehicle Compliance and Exception/Variance Verification electronic template document (per Appendix 1, Figure 1) to be completed, printed and signed by the FSAM. This document shall be provided in the handbook of instructions.
- 3) A multicolored Payload Calculation and Verification electronic template document (per Appendix 1, Figure 2) to be completed, printed and signed by the FSAM. This document shall be provided in the handbook of instructions.

FSAM companies should fill out the attached registration form and submit to CAAS GVS as noted. Following review and approval, you will receive access to the online storefront to purchase the **Vehicle Certification Packages outlined above.
